

WHAT IS CLAIMED IS:

1. A packaging system for packaging rewritable paper, comprising:
a paper feeding device which supplies a prescribed number of sheets of rewritable paper to be packaged as one set;
a contents adding device which adds prescribed contents to the one set of rewritable paper; and
a packaging device which packages the one set of rewritable paper, in a state in which the contents have been added, into a prescribed form to be sold.
2. The packaging system according to claim 1,
the contents adding device adding the prescribed contents to all or part of the one set of rewritable paper; and
the packaging device accomplishing packaging into a prescribed form permitting visual recognition from outside of the fact that the prescribed contents have been added to the all or part of the rewritable paper.
3. The packaging system according to claim 1,
the contents adding device adding the prescribed contents to prescribed sheets of the rewritable paper including at least a leading portion thereof; and
the packaging device packaging the rewritable paper into a form permitting visual recognition of the contents printed on the leading portion from outside.
4. The packaging system according to claim 1, the contents adding device printing the prescribed contents onto the prescribed sheets of the rewritable paper from among the one set of rewritable paper fed from the paper feeding device.
5. The packaging system according to claim 1, the contents adding device inserting the rewritable paper having the prescribed contents printed thereon at a prescribed position of the one set of rewritable paper.
6. The packaging system according to claim 1, the contents adding device adding related information directly associated with commercial sale of the rewritable paper.
7. The packaging system according to claim 1, the contents adding device adding added value information which provides added value when the rewritable paper is commercially sold.
8. The packaging system according to claim 1, further comprising a contents supplying device which supplies contents to be added by the contents adding device, and the contents added by the contents adding device being changeable to different contents supplied by the contents supplying device.

9. The packaging system according to claim 1, further comprising a contents specifying device to specify the contents to be added by the contents adding device.

10. A sales method for commercially selling rewritable paper, comprising:
printing prescribed contents to be added, in advance, onto the rewritable paper in an initial sales stage, the printed contents being erasable when the rewritable paper is actually used.

11. The sales method of rewritable paper according to claim 10, further comprising: selling a prescribed number of sheets of rewritable paper as one set; printing in advance the prescribed contents on all or part of the rewritable paper; and selling the rewritable paper by packaging into a form permitting visual recognition, from outside, of the fact that the prescribed contents are printed on all or part of the rewritable paper.

12. The sales method of rewritable paper according to claim 10, further comprising:
printing in advance the prescribed contents onto prescribed sheet of rewritable paper including at least the leading portion of the one set of rewritable paper, and selling the rewritable paper by packaging into a prescribed form permitting visual recognition, from outside, of the contents in the leading portion.

13. The sales method of rewritable paper according to claim 10, the prescribed contents being related information directly associated with commercial sale of the rewritable paper.

14. The sales method of rewritable paper according to claim 10, the prescribed contents being added-value information which provides added value when commercially selling the rewritable paper.

15. The sales method of rewritable paper according to claim 10, further comprising: receiving specification of the prescribed contents which a purchaser of the rewritable paper demands printing, and selling the rewritable paper having the specified contents printed thereon.

16. Rewritable paper prepared into a form for selling to a purchaser, comprising:
a sheet on which prescribed contents are printed in an initial sales stage, the contents being erasable when the purchaser uses the rewritable paper.

17. The rewritable paper according to claim 16, a prescribed number of sheets being treated as one set when selling the rewritable paper; prescribed contents being printed onto all or part of the one set of rewritable paper; and the set of rewritable paper being

packaged into a prescribed form permitting visual recognition, from outside, of the fact that the prescribed contents are printed on the all or part of rewritable paper.

18. The rewritable paper according to claim 16, prescribed contents being printed on a leading portion of the one set of rewritable paper, and the one set of rewritable paper being packaged in a form permitting visual recognition, from outside, of the contents.

19. The rewritable paper according to claim 16, the prescribed contents being related information directly associated with commercial sale of the rewritable paper.

20. The rewritable paper according to claim 16, the prescribed contents being added-value information which provides added value when commercially selling the rewritable paper.
